Educational Benefits of Globaloria

With Globaloria, students develop the STEM & 21st century skills needed for success in today's digital knowledge economy.

photo by Mary McHenry Photography

- Preparing ALL students for college and career success by teaching them to:
  - Engage in self-directed, self-paced learning
  - Participate in constructive teamwork
  - Develop organizational abilities, time management skills, and collaboration and presentation skills
  - Develop computational thinking practices, problem decomposition and pattern recognition
  - Develop industry-standard media production and programming tools and skills (coding)
  - Master Web2.0 and social networking skills

- Engaging and challenging students through game play and design, including:
  - Learning by analyzing and building video games
  - Taking an original project from conceptualization to publication
  - Mastering STEM content by constructing a STEM-focused educational game

- Guiding students toward effective digital citizenship by empowering them to:
  - Express themselves professionally, both verbally and in writing
  - Navigate and participate online safely and ethically
  - Find and discern good sources and content on the web

- Standards-infused curriculum
